1. Link - Text: "edit"
   - On selection, user will arrive at either Departure or Return portion of the "Select Flight" page in order to select a different flight option

2. Input Field - Label "Name (As It Appears on Official Photo ID)" - Input Type: Name Text
   - On selection, field will have a highlighted blue border.
   - Placeholder text: "First Name, Middle Name/Initial, Last Name"
   - If less than 2 names (first and last) are entered, inline validation will cause field to be highlighted red with an error message reading: "Please enter your name exactly as it appears on official photo ID" to display below field.
   - On entry, names will auto format to capitalize the first letter of each name entered.
   - If name entered exceeds the available space, the field will extend down as a second line of text. The next line of passenger information also move down to accommodate.

3. Input Field - Label: "Email" - Input Type: Email Text
   - On selection, field will be highlighted with a blue border.
   - Placeholder text: "email@email.com"
   - Inline validation to check validity of email address entered after field has been de-selected. If email is invalid, yellow caution symbol to appear with error message reading: "Please enter a valid email address." appearing below the field
   - On mobile, keyboard appear with "@" and "." symbols in place of the space bar.
   - If email entered exceeds the available space, the field will extend down as a second line of text. The next line of passenger information also move down to accommodate.

4. Dropdown Selector - Labels: "Depart" and "Return"
   - On selection, dropdown options will display boarding classes as numerical values with accompanying prices. 1 will be the most expensive with prices decreasing as the boarding class increases. The last boarding class option will be coupled with a price that reads "Free"
   - On selection of the "Depart" boarding class, the dropdown will close and the "Return" boarding class dropdown will open automatically.
   - After selection, each dropdown selector title will update to display the chosen boarding class and price.
   - If user does not make a selection, the default selection will be the "Free" option.

5. Dropdown Selector - Label: "Baggage"
   - On selection, a dropdown list of ascending numerical values from 0 to 5 accompanied by prices will appear. The 0 and 1 option's prices will read "Free", with additional charges beginning at 2.
   - If user does not select any options, no error message will occur. The passenger will be later notified with a confirmation email that they are permitted to bring up to 1 bag for free.

6. Text - Auto-update price as selections are made

7. Text Grouping - Auto update prices as selections are made. Prices broken down for clarity.
   - On hover of "Taxes" and "Fees", a list of taxes and fees will display as a text box.
   - Text grouping will expand left to account for more passengers.

8. Button - Label: "Continue to Payment"
   - On selection, user will arrive at the next page, "Pay and Book!"
   - If user did not enter a Name or Email, the empty field will be highlighted in red with an error message below the field reading: "Please enter *NAME/EMAIL*." depending on which field is empty.
